## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because they contain lead lines with no reference numerals. Specific reference is made to figure 1. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3764

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Reneau et al. (U.S. 4,408,759). Reneau discloses as broadly claimed, a removable horizontal gripping bar (50) for supporting at least a portion of the force generated by a user during exercise, a vertical frame comprising a pivotally attached rear frame (85) capable of freely standing (based on the shape of (90), and a pair of vertical side support frames (15) pivotally attached to the rear frame, a user support base having opposing sides and opposing ends and capable of supporting at least a portion of the force generated by a user during exercise, the user gripping bar being removably attached to each of the vertical side support frames and one end of the user base capable of abutting the vertical rear support frame. Referring to claim 2, Reneau teaches a pair of stabilizing legs (13). Referring to claim 3, as broadly construed absent further limiting disclosure, Reneau teaches a first and second pair of vertical side support frames (15, 60) pivotally attached to the rear support member. Referring to claim 4, as broadly interpreted, Reneau teaches the user gripping bar being vertically adjustable at a plurality of discrete vertical positions. With respect to claim 5, Reneau teaches that extensions (292) may be removably attached to the base member.
